DETAILED ACTION

Claim Objections

Claims 1 and 6-10 are objected to because of the following informalities: "either" should be removed at claim 1, line 12. Appropriate correction is required.

Election/Restrictions

Newly submitted claims 21-30 are directed to an invention that is independent or distinct from the invention originally claimed for the reasons laid out in the Office Action mailed 20 October 2005.

Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claims 21-30 are withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-5, and 9 are rejected under 35 U.S.C. 102(b) as being anticipated by Stelter et al. (US 5,051,780).

Art Unit: 2852

Stelter et al. disclose an image forming apparatus including an image formation unit for forming and bearing a toner image on a recording material, as shown in figure 1; a fixing apparatus including a heat-fixing rotation member (45) and a pressure rotation member (47) with an elastic layer (102). Fuser controller (130) is a controller for controlling power supplied to the first heater (113) and second heater (103). The apparatus operates in a duplex mode and simplex mode, which reads on a plurality of selectable modes. See col. 3, lines 49, 64. In a duplex run both heaters are used, while in a simplex heater only one heater is used. In duplex the duplex remains at 415 F, while the simplex roller is reduced to 375 F. Col. 4, lines 50-55. This reads on a same target temperature for the heat-fixing rotation member and to different target temperatures for the pressure rotation member and on a mode in which no power is supplied to the second heater. The time between sheets corresponds to a non-printing time.

Regarding claims 3 and 9, sensors (104, 114) are first and second temperature detecting elements.

Allowable Subject Matter

Claims 6-8 and 10 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

Ota (US 6,882,808) discloses maintaining the same fixing roller temperature and different pressure roller temperatures in a plurality of modes during standby. Ota does not disclose a heater in the pressure roller.

Art Unit: 2852

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a).

Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
